

# ConBee III

The universal  
Zigbee USB-Gateway

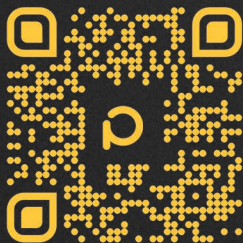

Windows

macOS

Linux

ConBee III Website

- » unites Zigbee devices of many vendors
- » a cloud free solution
- » high range of up to 30 m in buildings and 200 m in open field
- » works with popular Home Automation Systems

## What's new

The shipping firmware supports Zigbee 3.0 and Zigbee Green Power devices. Alternatively, the OpenThread Border Router function can be used.

- » modern SiLabs EFR32MG21 micro controller
- » custom Zigbee 3.0 and Zigbee Green Power firmware
- » Bluetooth Low Energy (BLE) for Thread and Matter applications
- » integrated push button for service functions

## Compatibility

The ConBee III is compatible with a wide range of lights, switches and sensors from Philips Hue, Ikea Tradfri, Xiaomi Aqara, Ledvance Smart+, Silvercrest, Schneider Electric, Nouis and Sonoff.

## Platform independent

The ConBee III transforms mini computers such as Raspberry Pi as well as PCs and laptops into universal Zigbee gateways.

Using the Phoscon App backup function it is possible to transfer a Zigbee installation to a new system. For example, you can migrate an existing setup from a Raspberry Pi to a more powerful Intel NUC.
